## Southern Medical Association

April 13, 1961

TO: MEMBERS OF THE SOUTHEASTERN PLASTIC AND  
RECONSTRUCTIVE SURGERY SOCIETY

Dear Doctors:

The Southern Medical Association has accepted our specialty as a Section which is indeed an honor. We have been given the privilege of two half days on the program. One of these sessions will be together with the Section on Surgery and will be titled "Trauma." In the near future you will receive a request to participate in this combined session, so give thought to such and present a paper. The other half day will be entirely to ourselves and you may give a paper on any subject you desire. The presentations will appear, if accepted, in the Southern Medical Journal which enjoys a wide circulation.

The Southern Medical Association meets in Dallas, Texas, November 6-9, 1961. The host cities, Fort Worth and Dallas, are combining their efforts and it is anticipated that this meeting will be the largest attended in the history of the Southern Medical Association. There will also be a closed circuit television program in color. We will have two hours devoted to our specialty.

Let us all concentrate and make our portion of the program a success. If you have a paper to present, send a title now and later an abstract. Your Executive Committee met in Atlanta and desires that you know they have started plans in supporting a good representation. Further discussion will take place at our meeting in Williamsburg.

Sincerely yours,

Clifford C. Snyder, M. D.  
Secretary, Section on  
Plastic & Reconstructive Surgery
